This looks good - but we will also need the "spend plan" for the execution side of the equation - which goes through the end of 2005 and includes all the other expenditures we've identified. We will obviously be wagging this - but it will be in line with execution of the communications plan and the required resources to make this happen.

I have adjusted the timeline/milestone chart to reflect the estimated resources which I am attaching for your review. Also, I have adjusted the application forms to reflect the changes we discussed and updated the files to increase the budget to \$2M to match the cost share on the application forms.

The only thing I have left to do is the detailed budget which according to the RFP needs to reflect the cost and services performed for every contractor which I will want to discuss with JP before completing.

I am attaching all the files that I have worked changed for your input, do you want to try and get together today or tomorrow and go over the changes.

Thanks.

WILDman

NOTE: THE BRAC INITIATIVE AGREEMENT WAS SIGNED ON SEPT 30, 2003, NEARLY TWO WEEKS BEFORE THIS EMAIL TRAIL BEGAN.
